# Whose Voice in the Scenario?

## A Scoping Review of Diversity, Equity, and Inclusion in Simulation-Based Health Professional Education

**Kimberly Forsyth • Charlene Ronquillo**
Interior Health • UBC Okanagan School of Nursing

## BACKGROUND

Simulation-based education offers opportunities to prepare health professionals to to deliver equitable care to diverse patient populations.
**However, guidance for integrating diversity, equity, and inclusion (DEI) into simulation remains limited.**

## OBJECTIVE

To map the evidence on DEI integration in simulation-based health professional educaiton:

- Integration Strategies
- Student & Simulationist Perspectives
- Outcomes & Evidence Gaps

## METHODS

**Design**
JBI-guided scoping review
PRISMA-ScR reporting

**Search**
MEDLINE CINAHL Embase
2010-2025

**Eligibility**
Primary DEI-SBE research
Acute care students

**Screening & Synthesis**
Two-stage screening
Narrative synthesis

## STUDY SELECTION

1670 Records imported into Covidence
↓
1,296 Titles and abstracts screened
↓
57 Full texts assessed
↓
**13 Studies included**

## STUDY CHARACTERISTICS

| 13 | 5 | 9 |
|---|---|---|
| studies | countries | recent studies |

**Study design**
10 quantitative | 3 qualitative

**Simulation Modality**

## KEY FINDINGS

**DEI integration varied**
Prebriefing, debriefing, standardized patients, and community involvement.

**Learners valued DEI simulation**
Greater awareness, reflection, and confidence were reported.

**Simulationist perspectives were limited**
Only one study directly expolored educators' experiences.

**Outcomes were promising but mixed**
Long-term and patient outcomes remain unexamined.

## IMPLICATIONS FOR PRACTICE

**Embed DEI** across all simulation phases.
**Engage communities** for authentic representation.
**Support educators** through training and reflection.
**Evaluate outcomes** beyond immediate learning.

## RESEARCH GAPS

Validated evaluation tools
Long-term outcomes
Lived-experience perspectives

## FROM EVIDENCE TO PRACTICE

Findings informed the development of a DEI simulation scenario template to support inclusive simulation design.

## KEY TAKEAWAY

**Inclusive simulation requires intentional design, authentic representation, educator preparation, and meaningful evaluation**
